

This is That

MARTIN J. YOUNG

- For many of us, we don't just yearn for something better, away from this existence: we look for this one to be packed full of goodness and satisfaction.
- As a release and relief to the rigours and horrors of the here and now, a present day heaven would be a first choice if it weren't so unimaginable. This longed for, already tasted, sometimes-held-sometimes-lost rightness of life is the Kingdom of Heaven.
- When the Kingdom is experienced, we usually know it and appreciate it, even though we can't always define it or recognise its source. We know the feel of its breeze on our skin, naked and not ashamed. The Kingdom of God is it. It's what we are all longing for, deep down: every human being on the planet. It is the way that we were always meant to live, our default culture.
